

EDITORIAL

Here it is folks, as promised - the first annual Proceedings Issue of *Canadian Acoustics*. It constitutes the proceedings of the technical sessions of Canadian Acoustics Week 1991 which will be held in Edmonton in October. Two-page summaries were received from 56 of the 73 people who will present papers at the conference. Many thanks to everyone who worked hard to produce their summary papers, to submit them on time and to put them in the required format. I think these proceedings are something that we all can be proud of.

Last year I promised to investigate having papers published in *Canadian Acoustics* cited in the various citation indices. I have written to ten such indexing services and have had responses from five. I am pleased to be able to report that, from now on, *Canadian Acoustics* papers will be cited in the following indices: References to Current Papers on Acoustics (JASA); Acoustics Abstracts; Shock and Vibration Digest; Physics Abstracts; Industrial Hygiene Digest. I will report to you again when I hear from the other citation services.

Between now and the publication of the December issue, your Editor-in-Chief is moving across the country. He has been asked by the Board of Directors, and has accepted, to continue editing the journal. However, this will involve considerable disruption (finding a new printing company, transferring our Post Office account etc.) in publishing the next issue, in which I'll provide details of my move and my new mailing address. I'll do my best to keep publication on schedule, but please bear with me if necessary.

Tel que promis, voici, chers amis, la première publication du Cahier des Actes de l'*Acoustique Canadienne*. Ce numéro constitue les actes de la Semaine de l'Acoustique Canadienne 1991 qui sera tenue à Edmonton en octobre. Nous avons reçu les sommaires de deux pages de 56 des 73 personnes qui présenteront des communications au congrès. Nous remercions tous ceux qui ont travaillé fort afin de préparer leur sommaire, de le soumettre dans les délais et qui ont respecté le format demandé. Je pense que nous pouvons être fiers de ces actes.

L'année dernière, j'avais promis d'investiguer la possibilité que les papiers publiés dans l'*Acoustique Canadienne* soient cités dans les différents répertoires de citations. J'ai écrit à dix de ces services de répertoires et ai reçu cinq réponses. Je suis heureux de vous faire part que, à partir de maintenant, les articles publiés dans l'*Acoustique Canadienne* seront répertoriés dans: References to Current Papers on Acoustics (JASA); Acoustics Abstracts; Shock and Vibration Digest; Physics Abstracts; Industrial Hygiene Digest. Je vous ferai de nouveau rapport lorsque j'obtiendrai des nouvelles des autres services de citations.

Entre aujourd'hui et la publication du numéro de décembre, votre rédacteur en chef déménagera à travers le pays. Le conseil d'administration lui a demandé de continuer son travail de rédacteur en chef, ce qu'il a accepté. Cependant, ceci risque de provoquer de considérables problèmes (trouver une nouvelle compagnie d'impression, transférer notre compte au bureau de poste, etc.) dans la publication du prochain numéro, dans lequel je transmettrai les détails de mon déménagement et de ma nouvelle adresse postale. Je ferai tout mon possible afin de respecter la date de publication, mais j'apprécierais grandement que vous soyez indulgents à mon égard, si nécessaire.

Superior Instrumentation for Acoustics and Vibration

LARSON-DAVIS LABORATORIES

We have become a new technology leader in acoustics and vibration measuring instruments. Our goal is to provide advanced, precise, high-quality products at very reasonable prices. As the result of a substantial ongoing research program, Larson-Davis products provide versatility and automation untouched by any competitive offerings. Our growing product family includes:

- Portable multichannel Real-Time analyzers delivering 1/1, 1/3 and 1/12 octave bands to 125 KHz with future plug-in modules for FFT, acoustic intensity, memory expansion, etc.
- Underwater acoustic analysis equipment.
- Precision sound level meters with computer interfaces and automated control of 1/1 and 1/3 octave filters.
- Data logging noise dosimeters and hand-held sound level meters.
- Environmental and industrial noise monitoring systems.
- Building and architectural acoustics analyzers.
- Vibration measuring and monitoring instruments.
- Audiometric calibration instruments for speech and hearing.
- Network airport noise monitoring systems, with management planning software.
- Precision measuring microphones, preamplifiers, power supplies, instrumentation amplifiers, acoustic intensity probes, calibrators and accessories.

PROCEEDINGS OF CANADIAN ACOUSTICS WEEK 1991 ACTES DE LA SEMAINE CANADIENNE D'ACOUSTIQUE 1991

Table of Contents / Table des matières

| <u>Small Enclosures - Computations</u> | <u>Page</u> |
|---|-------------|
| Comparison of Computational Methods for Rectangular Silencer Insertion Loss Prediction, R. Ramakrishnan, R. Stevens and B. Howe | 5 |
| Bagpipes - A Program for Analyzing Acoustic Transmission in Ductwork, P. Fuchshuber and A. Craggs | 7 |
| PC.Circle, Circular Duct Silencer Performance Prediction Software, R. Ramakrishnan and N. Ball | 9 |
| <u>Small Enclosures - Measurements</u> | |
| Effect of Bulkhead Fixing on the Noise Inside the Airplane Cabin, L. Cheng and J. Nicolas | 11 |
| Optimum Positioning of Duct Silencers in Sound-Rated Construction, M.Q. Wu, T. Paige and D.L. Allen | 13 |
| Acoustic Pulsations in Reciprocating Machinery, B.C. Howe, S.D. Greenfield and C.K. Schuh | 15 |
| Simulation of the Orifice Gauge Line Effect in Pulsating Flow, W.M. Jungowski, G. Petela | 17 |
| <u>Architectural Acoustics</u> | |
| Reverberation Chamber Measurement of Theatre Chair Absorption, J.S. Bradley | 19 |
| Modern Acoustic Measurements on Canadian Stages, J.P.M. O'Keefe and M. Bracken | 21 |
| A Comparison of Subjective Speech Intelligibility Tests in Reverberant Environments, K. Kruger, K. Gough and P. Hill | 23 |
| Théâtres Modernes ou Anciens, Salles Symphoniques, Sonorisation de Grands Locaux - Utilisation de l'Indice Rasti et du Temps de Réverbération Initial pour l'Analyse des Problèmes d'Acoustique Architecturale, Jean-Gabriel Migneron, Christian Martel | 25 |
| Acoustic Strategy: Public Works Canada, G.E. Clunis | 27 |
| <u>Acoustic Radiation</u> | |
| Numerical Methods for Solving Acoustic Radiation Problems, L.J. Cremers and K.R. Fyfe | 29 |
| Vibro-Acoustic Behaviour of a Plane Radiator in the Case of Impact Excitation, D. Trentin and F. Laville | 31 |
| Simulation of the Acoustic Radiation Emitted by Vibrating Structures, J. Nicolas, A. Berry, D. Trentin and F. Laville | 33 |
| <u>Acoustic Sources</u> | |
| Acoustic Augmentation of the Entrainment Coefficient of Axissymmetric Free Air Jets, P.J. Vermeulen, P. Rainville, V. Ramesh and W.K. Yu | 35 |
| Experiments on Active Power Minimisation, M.E. Johnson and S.J. Elliott | 37 |
| Electromagnetic Acoustic Noise and Vibrations of Electrical Machines; Their Production and Means of Reduction, S.P. Verma and A. Balan | 39 |
| Symphonic Bells of "Fantastic" Proportion, D. Caswell | 41 |
| <u>Electroacoustics</u> | |
| Progress on the Development of Standards for Sound Intensity Measurements, G. Krishnappa | 43 |
| Electroacoustical Research and Acoustical Calibrations at INMS, G.S.K. Wong | 44 |
| Consequences of Nyquist Theorem for Acoustic Signals Stored in Digital Format, M. Roland-Mieszkowski and W.R. Young | 45 |
| Digital Generation of the High Quality Periodic Audio Signals with the Aid of a D/A Converter, M. Roland-Mieszkowski | 47 |
| <u>Vibration and Noise Control</u> | |
| Rock-Drill Handle Vibration: Measurement and Hazard Assessment, S.E. Keith and A.J. Brammer | 49 |
| Subsynchronous Vibration of an Auxiliary Turbine, B. Alavi and C. Hugh | 51 |
| Development of Diesel Generator Isolation Systems for Low Noise and Vibration, G.E. Clunis and S.J. Bradley | 53 |
| Design Optimisation of High Speed Axially Loaded Ball Bearings of a Turbo-Pump, B. Alavi | 55 |

| | Page |
|---|-------------|
| <u>Vibration and Noise Control (continued)</u> | |
| Computed Order Tracking Applied to Vibration Analysis of Rotating Machinery, E.D.S. Munck and K.R. Fyfe | 57 |
| Mise au Point d'une Technique d'Intensimétrie Polaire Perspectives d'Utilisation, G.G. Migneron and P. Lemieux | 59 |
| Suggestions for Change to ISO 9614, R. Guy and J. Li | 61 |
| <u>Underwater Acoustics</u> | |
| Predicting Acoustic Radiation from Coupled Fluid/Structure Systems: A Comparison of Two Computer Codes, L.E. Gilroy and D.P. Brennan | 67 |
| Vibration and Sound Radiation of a Double-Plate System, A. Berry, F. Laville, J. Nicolas and D. Stredulinsky | 69 |
| Acoustic Backscattering from Cylinders: Near-Field Corrections, D.M.F. Chapman and F.D. Cotaras | 71 |
| The Effect of Sediment Layering on Ocean Bottom Reflection Loss, F. Desharnais | 73 |
| <u>Hearing and Noise Exposure</u> | |
| Comparison of Noise Exposure Levels Between Workplaces, A. Behar | 75 |
| The Effects of Music Technology on Hearing: A Case Study of St. John's Bars, S. Lenser and E. Rizkalla | 77 |
| Electroacoustical and Real-Ear Comparisons of Assistive Listening Devices, P. Dobbins and S. Douglas | 79 |
| Signal Detection and Speech Perception with Level-Dependent Hearing Protectors, S.M. Abel, N.M. Armstrong and C. Giguère | 81 |
| Digital Hearing Aids - The Way of the Future, M. Roland-Mieszkowski and S.D. Clements | 83 |
| Update to Noise Control Directive ID 88-1, C.D. DeGagne and R.G. Write | 85 |
| A Proposal for a New Federal Regulation on Noisy Toys, T. Leroux and C. Laroche | 87 |
| <u>Speech Production</u> | |
| Acoustical Analysis of Nasal Resonance Patterns in Speech, A. Putnam Rochet and B.L. Rochet | 89 |
| Developmental Aspects of Second Formant Trajectories, M.M. Hodge | 91 |
| The Role of Phonetic Context in the Articulation of Semivowels by Preschool Children, E.B. Slawinski | 93 |
| <u>Speech Perception and Auditory Processing</u> | |
| Representation of Speech Signals in the Disordered Peripheral Auditory System, D.G. Jamieson, M.F. Cheesman, S. Krol | 95 |
| Discrimination of Static and Dynamic Frequency Changes in Children and Young Adults, J.F. MacNeil and E.B. Slawinski | 97 |
| Acoustical Cues in /R-W/ Discrimination, L.K. Fitzgerald and E.G. Slawinski | 99 |
| A Computer-Driven Program to Improve Speech Perception and Speech Production Skills, S. Rvachew | 101 |
| <u>Speech Perception and Speech Synthesis</u> | |
| Computer Modelling of Lexical Tone Perception, F. Chen and A.J. Rozsypal | 103 |
| Effect of Consonant and Vowel Context on Mandarin Chinese VOT: Production and Perception, B.L. Rochet and Y. Fei | 105 |
| A Demisyllable-Based Text-to-Speech Synthesis System for English, S.J. Eady, P. Ollek and J.R. Woolsey | 107 |
| <u>Speech Processing and Applied Speech Technology</u> | |
| Canadian-Designed Software for Speech Analysis and Synthesis, B.C. Dickson, A.G. Wynrib, R.C. Snell, S.J. Eady and J.A.W. Clayards | 109 |
| An Imelda Based Voice Recognition System: A Step Towards Effective Voice Recognition for Persons with Severe Disabilities, G.E. Birch, D.A. Zwierzynski, C. Lefebvre, D. Starks | 111 |
| <u>Speech Recognition</u> | |
| Hierarchical Non-Stationarity in a Class of Doubly Stochastic Models with Application to Automatic Speech Recognition, L. Deng | 113 |
| Exploiting Pauses in Continuous Speech Recognition, D. O'Shaughnessy | 115 |
| A Non-Linear Analysis for Clean and Noisy Speech, J. Rouat, Y.C. Liu and S. Lemieux | 117 |
