Journal of the Canadian Acoustical Association - Revue de l'Association canadienne d'acoustique

This is a special issue, in French as it used to be the practice for decades for the June issue of Canadian Acoustics, is about "Themes of Pedagogy and Sound". The guest editor is Mrs Pascale Goday, PhD Candidate in "Étude et pratique des arts" at UQAM, president of "Semaine du son Canada" and professor in music education and choir singing.

## Editorial

- [It's done: Canadian Acoustics journal moved to electronic format!](#)

Jérémie Voix

## Guest Editorial

- [Is it possible to educate about societal issues through the sound arts?](#)

Pascale Goday

## Special Issue

- [Heritage of sound ecology: listening to the Anthropocene through three works of sound art](#)

Estelle Schorpp

- [The sounds are not alone if we care about their meaning: sensory organ and socio-bio-ecosystemic music](#)

Pietro Calabretta

- [Educating on Urban Soundscapes: Towards an Immersive Approach to Raise Awareness of Societal Issues](#)

Mohamed Amin Hammami, Christophe Claramunt

- [On the Ontology of Sound](#)

Stacy Olive Jarvis

**JACK-UP FLOATING FLOOR USING EMERGENCY BELL-SHAPED HOUSINGS**

Stravifloor Jack-up-It is a jack-up isolated floating floor system using molded natural rubber bell-shaped cast iron housings cast into concrete and jacked up after the concrete has cured to provide the required void depth.

**Features**

- High Performance
- Low Cost
- Easy to Install
- Long Life

**Getting it right has never been so predictable.**

**DataKustik**

A unique software system for extended acoustic analysis and prediction.

DataKustik is the leading software development company offering state-of-the-art solutions in the field of acoustic modeling. Choose from several software solutions including:

- Calstat for the calculation of noise indices
- Calstat for the calculation of sound transmission between rooms
- Calstat for the assessment of sound distribution in rooms

Although each software is tailored to its specific field of application, they can be connected to form a powerful package for extended calculations from the outside to the inside and vice versa. For any type of acoustic calculation, from sound propagation outdoors to the assessment of noise inside, choose DataKustik. For more information about DataKustik products, contact us on Scantek for expert and responsive sales and support.

**SOUND. THAT WORKS.**

FOR PRODUCTIVE EMPLOYEES

**LOGISON**  
www.logison.com

HARNESS YOUR FACILITY'S FULL POTENTIAL TO HELP EMPLOYEES WORK, LIVE AND FEEL THEIR BEST.

Offices are meant to offer an environment free from the distractions of noise. Supporting both concentration and collaboration, however, poor acoustics can hinder work performance and cause employees to leave the office. With LogiSon's precision control over sound zones, full range loudspeakers, advanced microphones and a logi-SERVE™ intelligent system, the LogiSon Acoustic Network makes sound control a reality. Work smarter. Work better. Work with LogiSon. A place employees not only want to be, but want to stay.

**Yeah! That's the feeling when you know your measurements are accurate!**

**Catch the feeling with Scantek!**

The one source for all your sound and vibration hardware and software sales, rental and calibration needs.
